A - option of self-return mechanism (automatic folding seat after weight removal)

G - option of rack for storing newspapers and leaflets

T - padding

IN STUDIO

Tip-up seats are folding seats attached to the wall, perfect for halls and waiting rooms. Due to an unusual design they take little space in the passageways. As their frame does not have direct contact with the floor, they are a particularly good solution in objects where it is important to keep clean.

WAITING & AUDITORIUM SEATS

Proposed options allow for any configuration and compilation of benches and tables in lecture halls, auditoriums and conference rooms

As an option we offer a folding top (B), which we can put on the back of strapontin

The specially designed system of benches with plywood working table also has got two options - freestanding and attached to the floor (U).
